

EXPLORER HEADSET

Ideal for hospitality, retail, recreation and entertainment applications, and practical for users with multiple shift changes.

The **Explorer headset** is a single, flexible ear hanger that molds to the user's ear for a more comfortable fit. It can be worn on either the left or right ear and is adjusted by gently bending the rubber ear loop. A quick-disconnect acoustic tube allows multiple ear insert options and the ability to easily change out acoustic tubes. The small lightweight boom transmits audio without being obtrusive. Microphone can be activated by the radio's push-to-talk button or an optional in-line push-to-talk.
