

## PRODUCT INFORMATION

### Night Vision Device in Pocket Format

MINOX NVD mini featuring innovative digital technology

**M**INOX has long made a name for itself as a manufacturer of multifunctional measuring equipment and binoculars. The optics specialists from Wetzlar are now presenting another reliable and extremely compact companion for all water sports activities – the MINOX NVD mini – one of the smallest night vision devices in the world. For orientation purposes on high seas or also in calm waters this very compact night vision device is a must for your safety!

#### Durable and safe in the night

Night vision devices are always needed when even the most powerful binoculars with a high twilight factor reach their optical limits. They amplify the available residual light, such as light frequencies from the brightness of stars or horizon radiation, not perceived by the human eye. The new MINOX NVD is shock and impact resistant and can also be used in daylight.

With its compact dimensions of just 14.2 x 4.9 cm the MINOX NVD mini can be used anywhere. The ergonomic design enables a simple and easy operation and makes this night-vision device the perfect companion for all water sports activities.

The scope of delivery includes a case and a charging cable.

#### NVD mini – turns the night into day

- Distance up to 60 meters
- Innovative infrared-red digital technology
- 2x magnification
- Extremely compact and light
- Easy to use
- Durable and weather-resistant

Technical Data	NVD mini
